Shirley Resigns from the Board and We have a New Board Member ...

Long time board member Shirley Adams has resigned from the Historic Association board. After many years on the board, which she originally helped found, she has passed on her position to new member Jim Efav.

Shirley served as Secretary for many years, but her biggest contribution was her wealth of knowledge and endless inventory of old artifacts – and enthusiasm for sharing Metamora's rich history. If anything was needed or there was a question, Shirley – and co-member Ken – were THE trusted sources.

Shirley was also the guiding light on getting the Lincoln statue in the park and was honored by being the "face" for Melissa Goings, of whom there was no existing picture.

Even though Shirley will not be attending meetings, she's still always ready to share her knowledge of Metamora. THANKS SHIRLEY FOR ALL YOUR CONTRIBUTIONS!

Jim is pleased to join the board and looks forward to helping update the website and other social media. Jim will be a valuable addition to the board as electronic media continues to grow. Welcome, Jim!

What's New...

To the Stevenson House...

- Louis Willman's 50 Year Plaque from the American Legion
- Garber's Ice Cream Containers (thanks to Julie Zoss)
- Windows – Lee Summer has been working on restoring some of the windows
- Army blanket donated by Ken Willman

An Old Fashion Fall...

BIG PIGS

Pigs that have size . . . pigs that have weight . . . pigs that have frame and stretch . . . you can have them if you feed your sows and pigs Purina Sow and Pig Chow along with your corn instead of grain alone. It's a combination that helps make plenty of sow's milk for suckling pigs. It's a combination that gives pigs a flying start. They're up to 50 lbs. before you know it. Come in and get a few bags and see the difference it makes.

TIFFIN

Farm Wagons

Made by the Tiffin Wagon Co., Tiffin, Ohio, stand today as the highest type wagon made in this country. Everything in them is the best money will buy. Experts pronounce them better material all through, perfectly constructed, stronger, smoother finished, easier running and better painted than any wagon yet built.
